FOR IMMEDIATE RELEASE
8 A.M. EDT, October 14, 2015

Manchester, NH—CLD Consulting Engineers, Inc. (CLD), an established regional civil engineering consulting firm, is pleased to announce the acquisition of Lake Sunapee Survey, a Sunapee, NH-based firm offering professional land surveying and septic design services. The transition became effective October 1, 2015.

Lake Sunapee Survey, founded by Ray Critch, LLS in 2008, has been a preferred partner for land surveying services in the Upper Valley/Lake Sunapee region for many years, and has proven to be a very valuable resource to CLD's clients in their White River Junction / Lake Sunapee regional offices. CLD continually strives to provide full-service, civil engineering services to a variety of clientele, both municipal and private, and the acquisition of Lake Sunapee Survey is an important factor in supporting this expansion.

Lake Sunapee Survey has provided professional services including boundary and topographic surveys, subdivision staking and layout, ALTA/ACSM surveys, as-built surveys, site plans, septic design plans, and more.

"Since our initial engagement with CLD in December of 2011, they have been a valued business partner, and we have expanded our operation to support their growing client needs in the region," said Critch. "We owe a good portion of our success to CLD, and we are thrilled to become part of the company."

Critch grew his small firm steadily through the partnership with CLD, and he is now supported by their corporate headquarters office in Manchester, NH with a full range of competencies including field crews and other technical assistance. The entirety of Lake Sunapee staff will now become employees of CLD and will work from the firm's Sunapee, NH Office, under the CLD banner.

About CLD Consulting Engineers, Inc.

CLD Consulting Engineers, Inc. (CLD) has provided professional engineering services to communities, regional planning agencies, State and Federal agencies, as well as industrial and private clients throughout northern New England since 1976 and has offices in Manchester and Sunapee, NH; York, ME; and White River Junction, VT.

CLD provides an extensive range of comprehensive professional services including survey, site planning, civil engineering, traffic/transportation planning, bridge/highway design, water resources engineering, environmental engineering, solid waste management, structural engineering, permitting, construction management services including oversight and inspections, value engineering and peer review services.
